Sindh Madressatul Islam

Karachi , Sindh

2020 to 2024

Bachelor's in Computer Science

Malir Cantt College

Karachi ,Sindh

2018-2020

Intermediate in Pre-Engineering

Projects

Grocery App (Nectar) : Nectar is a Flutter-powered grocery app with a Node.js backend, enabling users to shop, favorite items, view orders, rate products, and manage profiles. The admin panel supports product management, order tracking, and sales analysis with interactive graphs, streamlining the grocery experience for both users and admins.

Real-Time Chat App : Built a Flutter chat app with Firebase, enabling real-time messaging, audio/video calls, profile updates, and story uploads, while managing chat and call history in Firestore with call notifications.

PDF Scanner and Reader : Created a document scanner and PDF reader app that scans, reads, shares, and deletes PDF files. Integrated file retrieval from WhatsApp storage , allowing users to easily access and organize their documents.

Weather App : Built a Flutter weather app that fetches real-time weather data via API, featuring location-based tracking, current conditions, and a user-friendly interface for Android and iOS.

Skills

Mobile Development:

Flutter, Dart

Database

Firestore Integration
API Integration

Version Control

Git, GitHub

Soft Skills

Problem-solving
